development of software for
interpreting Chest X-rays of
TB in children (CAD
computer-aided diagnosis)

TeAM activity in 2023 in graphs

In 2023, TeAM employed around 150 experts for 5,500 man-days, an average of 37 days per expert. The ratio of men to women was 2:1. Nearly two thirds of the assignments took place in French-speaking Africa (66%) and addressed funding request applications (59%). The characteristics of TeAM's annual human resources are shown in the figures below.
